EDUCATION

Kirinyaga University September 2021 – Expected Graduation: October 2025

BSC Software Engineering.

SKILLS

Languages: JavaScript
Tooling: GitHub, Git

PROJECTS

Portfolio Website	June 2022

- I build frontend websites with HTML/CSS and JavaScript.
- I also use ReactJS library to build user interfaces.
- I build Responsive web design to enable websites adapt to different screen sizes and devices
- This is a URL link for my portfolio website: https://ngetich-86.github.io/portfolio/

CMC Motors Clone	April 2021

- I worked with my team member to build CMC motors Clone as our project when we first learnt the basics of HTML and CSS.
- With the contribution of team members, we were successful in building the project. We used git version control to enable us work on same project simultaneously.
- This is the URL of the final product: https://kemboi590.github.io/cmcmotors1.github.io/

Form Validation	January 2023

- Form validation using JavaScript is a technique that involves checking user-inputted data to ensure it meets the required format and values before submitting it to a server.
- This process helps to minimize errors and improve the user experience by preventing unnecessary server requests and providing real-time feedback to users.
- This is the URL of the final product: https://ngetich-86.github.io/form-validation/

LEADERSHIP AND COMMUNITY INVOLVEMENT

Club Participant– Computer Society of Kirinyaga	September 2021-Current

As a club member of the Computer Society of Kirinyaga, I have had the opportunity to learn and collaborate with other technology enthusiasts in my community. Through this experience, I have been able to harness my creativity and innovation by working alongside team members who bring a variety of ideas to the table. In my role as a group leader, I have been able to guide and teach members in the latest web development technologies, including HTML, CSS, and JavaScript.

EDUCATION AND CERTIFICATION

Software Engineering – ALX-Africa SE	December 2022-Current

I am currently enrolled in the ALX Africa Software Engineering Program, a rigorous 12-month program designed to equip technology enthusiasts with both technical and work-ready skills necessary for a successful career as a Full-Stack Developer on a global scale.
